

Metallux ME600 monolithic pressure sensors are made with a ceramic cell and work following the piezoresistive principle. The Wheatstone bridge is screen printed directly on one side of the ceramic diaphragm by means of Thick Film technology. The diaphragm's opposite side can be exposed directly to the medium to be measured. Because of the Al₂O₃ ceramic excellent chemical resistance (aggressive gases, most of solvents and acids, etc.), no additional protection is normally required. Thanks to the reinforced outer area (monolithic structure), the sensor can be mounted directly in a plastic or metallic case by using O-ring. ME600 sensors are designed in such a way so that temperature changes and pressure overloads do not cause loss in reliability. Metallux ME600 sensors ensure optimal linearity across the entire range of measurement and minimize effects of hysteresis.

Metallux ME600 family substitutes ME662, ME663, ME651 and ME667 families

FEATURES

Excellent resistance to corrosion and abrasion

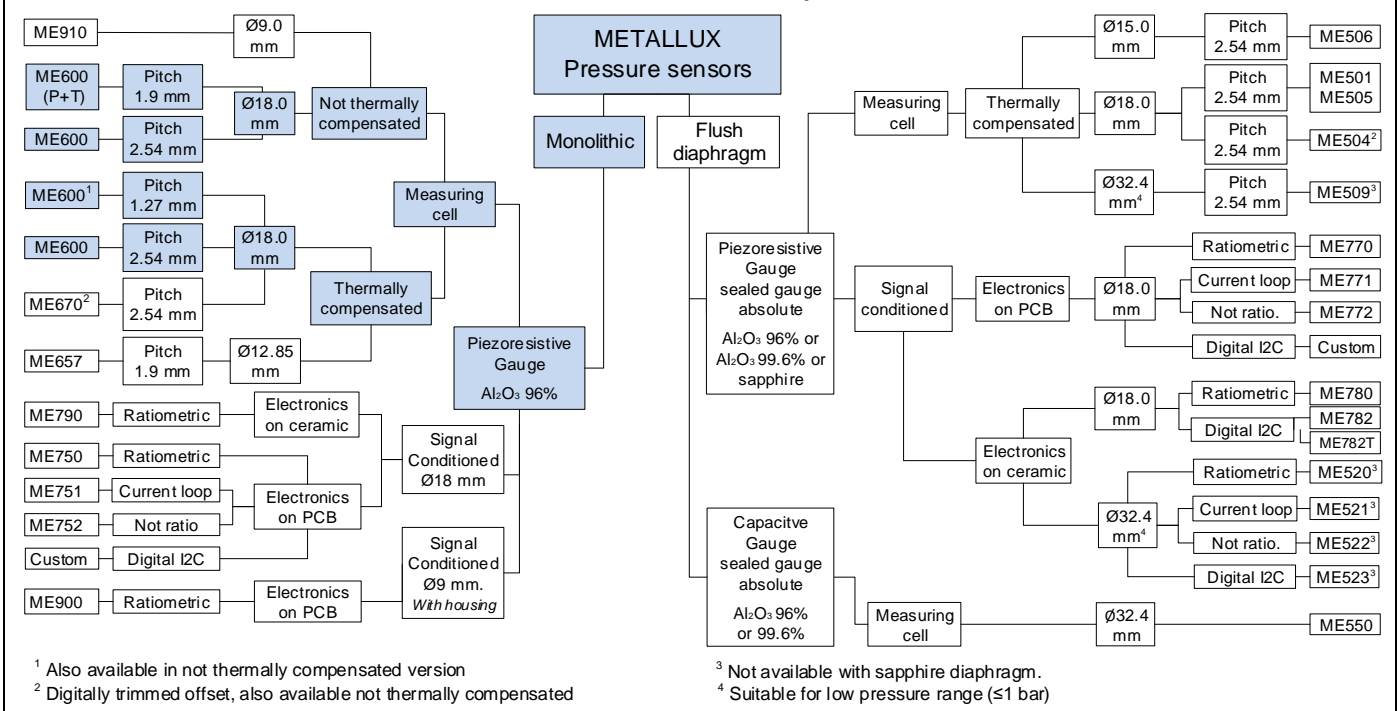

Optimized for high pressure applications

Easy mounting

Customizable

Technical characteristics

Parameters	Units	Description
Sensor type	-	Monolithic, gauge
Technology	-	Piezoresistive
Material	-	Ceramic Al ₂ O ₃ 96%
Weight	g	≤ 5 (ceramic cell only)
Response time	ms	≤ 1
Supply voltage range	VDC	2...30
Offset	mV/V	See ordering code, other available on request
Current consumption	mA	≤ 1.3 @ 10V
Operating temperature	°C	-40...+135 (-40 °F...+275 °F) ¹
Storage temperature	°C	-40...+150 (-40 °F...+302 °F) ¹
Bridge impedance	kΩ	11 ± 30%
Compliant with	-	REACH, RoHS, Conflict Minerals free

Tests performed at 25°C in Metallux housings, unless otherwise specified. Different housings may affect accuracy and thermal performances.

- Temperature limits depend on connection type, see box "Other types available" on page 4.
- Psi values for reference only.
- The sensitivity of each production batch is constant, within the indicated range and with minimal dispersion.
- Accuracy = $\sqrt{\text{NonLinearity}^2 + \text{Hysteresis}^2 + \text{NonRepeatability}^2}$, terminal based.
- All technical characteristics will remain within indicated ranges performing the above-mentioned reliability tests.
